¹ Smaller covers can be washed at home but commercial washers provide the best cleaning & rinse.

² Warranty is for defects in material and workmanship & against the fabric becoming unserviceable. We will repair or replace after factory inspection.

New Patterns are added every day - call if you can't find an application!
800 4-COVERS (426-8377) Monday thru Friday 8AM to 5PM CST

How to Order Custom & Ready-Fit® Covers

Locate the vehicle listing on the following pages. This application guide shows just a portion of the more than 80,000 patterns in our digitized cutting computer library. You have a choice of Custom Fit or Ready-Fit® patterns. The primary difference between the two styles is:

Custom Fit - Follows the exact contours of the vehicle body. The patterns are designed so the cover protects the sheet metal of the vehicle and normally extends half way down the tire. Custom Fit covers are more tailored and will not move around in the wind as much as a universal type cover. Due to body shape, not all covers require mirror pockets. The application guide notes the number of mirror pockets in each pattern.

Ready-Fit® - These covers are actually "semi-custom", since they come in staggered size lengths to make sure you don't get a cover that is too big for the vehicle. For cars, we use a "hatchback" shape to accommodate as many different styles of vehicles as possible. They do not have mirror pockets but the pattern makes allowance, with space for most styles of mirrors.

Noted below is an example of the information shown in the application guide:

CUSTOM FIT COVERS					WOLF™ READY-FIT® COVERS		
MAKE, MODEL & YEAR	PATTERN	SIZE	MIRROR	BODY	BLOCK-It® 200	BLOCK-It® 380	TECHNALON®
	No.	GROUP	POCKETS	STYLE	U4 SERIES	U7 SERIES	EVOLUTION® U8 SERIES
Integra Sedan, 1994-01	C14404	G3	2	a	C40004	C78004	C80004

This is the **Custom Fit** pattern number

The **size group** determines the price of the cover (you need to select a fabric in the size for your vehicle).

"2" means there are two mirror pockets. Pockets are on both the left and right side of the vehicle. "1" means there is a mirror pocket on the drivers side only. Nothing shown means there are no mirror pockets in the pattern but we can install them for you - please inquire.

Refer to the **"Body Styles"** chart at the bottom of this page to verify the shape of your vehicle.

These are **Ready-Fit** patterns available for this specific vehicle. They will provide a good semi-custom fit.

Covercraft is the world's largest manufacturer of custom vehicle covers. If your vehicle is not listed, please inquire. We can custom-make a cover to your dimensions. ***If it has wheels, Covercraft can cover it!***

To inquire about a vehicle that is not listed, please provide the following information with your order:

1-Make of Vehicle (Ford, Toyota, BMW) 2-Model Year (1995, 1998, etc.) 3-Vehicle Model (Camaro, Xtra Cab Pickup, etc.) 4-Body Style (refer to chart below) 5-Fabric Type Desired 6-Optional cable lock or bag required?

Be sure to advise us of any optional equipment or accessories added to the exterior of the vehicle - light bars, wings, body kits, spoilers, etc.

Covercraft's goal is to offer the widest range of fabrics to meet the needs and budgets of our customers. **Use the charts on the previous two pages to help select which custom pattern fabric is best suited for the protection needs of the vehicle.** If you have any additional questions, call us at 800-4-COVERS, or email sales@covercraft.com

NOTE - CHEVROLET FULL SIZE PICKUPS BODY CHANGES from 1999 on								
In the 1999 model year, Chevy introduced a NEW BODY style for their FULL SIZE PICKUPS and also continued the OLD BODY style for 1999 MODELS - both were called SILVERADO. Refer to the VIN # stamped in front of the dashboard on the driver's side. This number also appears on the vehicle license certificate as well as the title for the truck. The last six digits of the VIN # are the manufacturing number for that truck. OLD BODY style trucks use a number between 0 and 4.								
In 2007 another new body style was released. Trucks made between 1999 and 2007 that are NOT the new body style are noted as CLASSIC.

NOTE - GMC FULL SIZE PICKUPS BODY CHANGES from 1999 on								
In the 1999 model year, GMC introduced a NEW BODY style for their FULL SIZE PICKUPS and also continued the OLD BODY style for 1999 MODELS - both were called SIERRA. Refer to the VIN # stamped in front of the dashboard on the driver's side. This number also appears on the vehicle license certificate as well as the title for the truck. The last six digits of the VIN # are the manufacturing number for that truck. OLD BODY style trucks use a number between 0 and 4.								
In 2007 another new body style was released. Trucks made between 1999 and 2007 that are NOT the new body style are noted as CLASSIC.

From approximately 1984 on, Toyota pickups and the Toyota 4 Runner had two mirror locations. The only method to determine the correct part number for each application is to know whether the vehicle has one piece, no vent side windows or a two piece side window which has a vent window. The following patterns show mirror pockets for some of these vehicles, but in each case, the mirrors are the standard small mirror that was standard on the vehicle. Some of the truck owners removed this mirror and installed "low-profile" mirrors. In these instances, use the corresponding "no mirror" pattern.								
Pickup, SB, 1953-83	CA14	T1		i	C40010	C78010	C80010	---

VOLKSWAGEN								
IMPORTANT NOTE FOR 1999 MODELS OF JETTA, GOLF, GTI, AND CABRIO For 1999, there are two (2) models of each of the above cars available. One is referred to as the "New Body". There are two patterns for each of the above models. The old body cars use the same pattern as listed for 1998. The "New Body" models have a different pattern. If you are unsure as to which body the vehicle has, check the 6th, 7th and 8th characters in the VIN number. If the characters are either 81H or 81E, the car has the old body for the above four models. Any other set of characters will be a "New Body".
